ADM 15.4

DD/S&T 2121-66

5 MAY 1966

25X1A

MEMORANDUM FOR: [REDACTED]

Administrative Staff, DD/I

SUBJECT : OCR and ORR Proposed Revision of Mission and Function Statements

REFERENCE : Your note of 4 April 1966, same subject

1. This Directorate can accept OCR's objections to the execution of the phrase "and operate" in [REDACTED] provided the phrase "in accordance with established Agency ADP policy" is inserted after the word "operate". We can also accept OCR's desire to avoid adding the phrase "except where Agency regulations assign such responsibilities to other components" at the end of [REDACTED] provided the word "intelligence" is inserted before the word "information" or the phrase "within the framework of his assigned mission," is inserted before the word "promote".

25X1

25X1

2. The Director of the Office of Scientific Intelligence cannot agree that the phrase "and storage" should not be included as indicated in [REDACTED]. I suggest that [REDACTED] and Don Chamberlain get together at their convenience and discuss this because OSI's approved mission and function statement [REDACTED] states unequivocally that OSI has the responsibility for "...production of intelligence in all aspects of foreign atomic energy activities...".
